	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Depression Activated Film Roll Dispenser.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "36" has been used to designate both wall and feed slot. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in

Art Unit: 3653

the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said carrier" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cotilletta in view of Wise, as cited by the applicant in the "Description of Related Art Section".

Cotilletta teaches a dispenser comprising a roll of film peelably affixed to a support surface, 82; at least one set of notches, 95, formed on an edge of the support surface; a cylindrical support, 98 and 97, for receiving the roller therein, a first plurality of teeth, 96, formed on the cylindrical support surface for engaging the notches; a second plurality of teeth, 99, formed on the cylindrical support surface forming a pinion gear; a rack, 88, cooperating with the pinion gear for rotating the cylindrical supports; keeper arm means, 106 for maintaining tension on the roll, teeth, 107, mounted for limiting directional movement of the support surface.

Cotilleta does not however teach a peeling means for peelably removing the film from the support surface, but Wise does in Re 22,827.

It would have been obvious to one of ordinary skill in the art to combine the peeling means of Wise with the dispenser of Cotilleta if one desired to release the film from the support surface so that the use could easily pick up the film and use it.

Allowable Subject Matter

Claims 4-17 are allowed.

Independent claims 4 and 10 both claim a rolled film dispenser where the top portion is depressed onto the bottom portion which activates the feeding mechanism and advance the rolled film. The most relevant prior art, US Patents 5,119,969 and 6,755,321 teach a dispenser where a button or handle is depressed, they do not however teach that the entire top portion of the dispenser is depressed onto the bottom.

Therefore, claims 4 and 10, and those that depend from them have been found to be allowable over the prior art.

Application/Control Number: 10/696,763

Art Unit: 3653

Page 5

Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of

the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Kaitlin S. Joerger whose telephone number is 571-272-6938. The

examiner can normally be reached on Monday - Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Donald Walsh can be reached on 571-272-6944. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
